

Times
CLOTHING

Quietly excellent

Thirty years of craft. Made in the Emirates.

A Word Before You Begin

Cloth, considered Craft, continued

For thirty years we have cut, stitched, printed and embroidered for the brands that prefer restraint to noise. This volume is a quiet record of that work.

Established

1996

Ajman, U.A.E.

Capabilities

Four

Under one roof

Capacity

50K

Per month

"Every stitch
carries a name."

About Us

Quietly crafted, proudly made

Thirty years ago, we set up in Ajman with a single idea. A factory could be a creative partner, not just a production line. Today we manufacture for some of the most recognised names in the UAE and beyond. Every order, whether it is 50 pieces or 50,000, goes through the same in-house process, the same hands, the same standard. No middlemen. No outsourcing. Just cloth, craft and accountability. Proudly made in the Emirates since 1996.

The Promise

Four pillars. One standard

Manufacturing, Printing, Embroidery, Labeling & Branding — four capabilities under one roof, each held to the same high standard.

Pillar · 01

Fabric Manufacturing

(Circular Knitting, Dyeing & In-House Quality Control)

We manufacture using state-of-the-art circular knitting machines, producing consistent, high-quality fabrics at scale. Every fabric goes through rigorous in-house testing before a single garment is cut. Shrinkage control, pilling resistance and colour fastness.

Pillar · 03

Customization

(Printing/Embroidery)

Your brand deserves more than a standard logo placement. We offer three in-house printing techniques — sublimation, DTF and screen print — plus full embroidery services for crisp, durable logos on any fabric. From a chest emblem to an all-over print, every finish is produced under our roof, to our standard.

Pillar · 02

Production

(Cutting and Sewing)

Every pattern is precision-cut and sewn on our in-house production floor by experienced hands. We run a complete end-to-end process — from pattern-making and cutting to stitching and finishing — monitored at every step to keep tolerances tight and quality consistent whether your order is 50 pieces or 50,000.

Pillar · 04

Labeling & Branding

(Custom Labels and Hangtags)

The label is the last thing we add and the first thing your customer notices. We produce all branding elements in-house — woven neck labels, hem tabs, wash care labels, printed hangtags and barcodes — matched exactly to your brand specifications. Every detail finished with the same care as the garment itself.

Our Architecture

Four capabilities, one roof

A vertically integrated house. Fabrics, production, printing, embroidery, labelling and branding all live under one roof. No handoffs to third parties. No quality gaps between suppliers. No delays waiting on someone else's timeline. Every step of your order is managed, monitored and finished by us.

ISO 9001 certified — our quality management system meets the highest international standards, so every order is consistent, traceable and defect-controlled.

ISO 14001 certified — our environmental management system ensures we operate responsibly, minimising waste and impact at every stage of production.

Two certifications. One supplier. Complete accountability.

Manufacturing

Engineered for fit Finished by hand

Our manufacturing floor pairs precision machinery with experienced hands. From fabric selection and pattern-making to cutting, stitching and finishing, every step is monitored to keep tolerances tight and quality consistent at any scale.

Fabrics are produced to exact Pantone references, ensuring your brand colours are matched precisely across every batch and every reorder. Each fabric quality is tested in-house for shrinkage, pilling resistance and colour fastness before a single garment is cut.

From 50 pieces to 50,000, the standard does not change.

Sustainable Fabrics

Responsibly woven

Sustainability is not an add-on for us. It is built into our fabric sourcing. We offer a range of certified sustainable fabrics including 100% organic cotton and recycled PET bottle polyester — materials that reduce environmental impact without compromising on quality, hand-feel or durability.

Our organic cotton is grown without harmful pesticides or chemicals, certified to international standards and gentle on both skin and planet. Our recycled PET polyester is made from post-consumer plastic bottles, giving waste a second life in the form of high-performance fabric. Every sustainable fabric we use goes through the same rigorous in-house testing as our standard range. Shrinkage control, pilling resistance, colour fastness. Your brand stays green and your garments stay sharp.

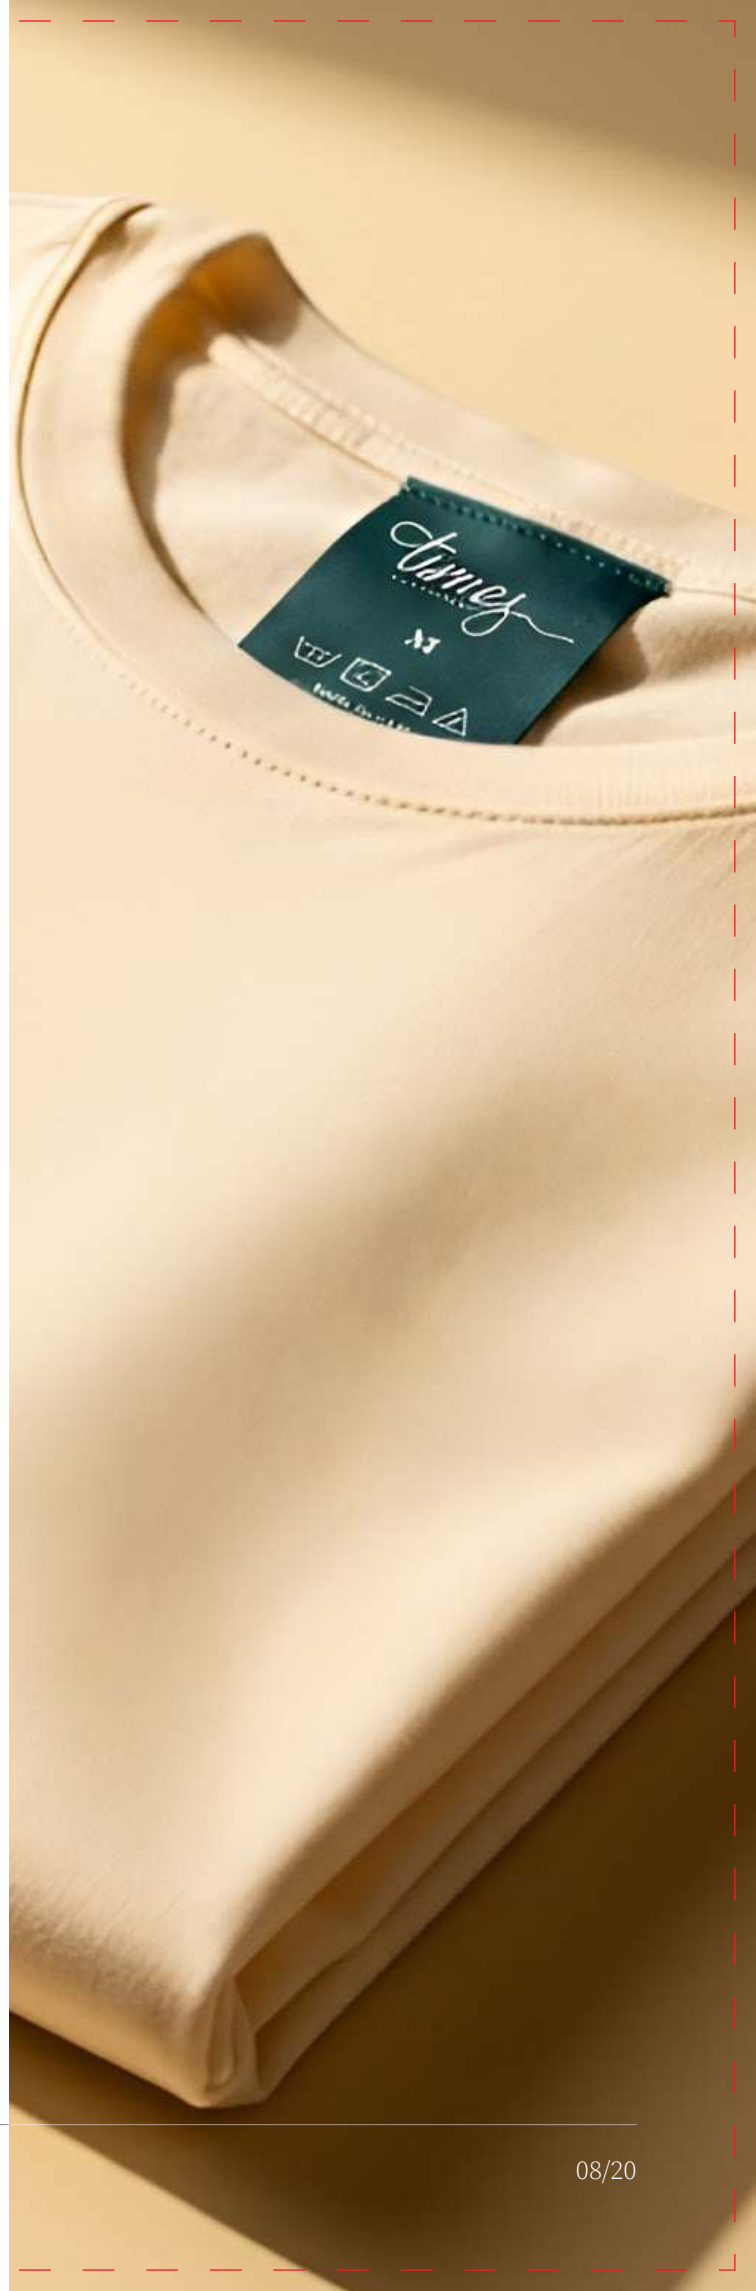

- Certified 100% organic cotton
- Recycled PET bottle polyester
- Rigorous in-house fabric testing
- Traceable supply chain

T-Shirts

Soft on skin. Sharp on brand

Cut from 100% organic cotton jersey and built to outlast the wash cycle. Available in 180 GSM standard fit or 260 GSM oversized, both finished with the same attention to seam, rib and colour consistency. Soft enough for daily wear. Sharp enough to carry your brand.

Polos

The boardroom standard, refined

The polo is the uniform standard across hospitality, corporate and field teams for a reason. It works. Ours are cut from premium cotton pique and dry-fit blends that hold their shape through long working weeks. Personalise with your logo, contrast trims and bespoke colours. The boardroom standard, refined.

Hoodies

Warmth, weighted in style

280 GSM or 360 GSM brushed fleece, weighted to feel substantial without bulk. Cut clean, finished with metal-tipped drawcords and ribbed cuffs. The kind of hoodie that does not pill after three washes or lose its shape after six months. Built for teams that wear their brand every day.

Activewear

Built to move Made to last

Moisture-wicking, four-way stretch fabrics engineered for movement. Whether that is a gym, a school sports day or a fitness event. The performance is technical. The finish is clean. Made to order in your colours, your cut, your brand.

Uniforms

Identity, worn as a system

A uniform is the first thing a customer sees and the last thing your team should have to think about. We build uniform programs that align to your brand identity. Durable fabrics, consistent sizing, reliable reorder. Trusted by hospitality, aviation, industrial and field teams across the UAE.

Schools & Nursery

Made for play Built for the year

School uniforms built for the reality of a school day. Durable enough for play, soft enough for comfort, and fully compliant with Dubai Municipality fabric standards. Formaldehyde-free. Bespoke to your school colours, logo and sizing. Programs designed to make procurement simple, year after year.

The supporting cast

Caps, bags, socks and kidswear — finished to the same standard as our garments.

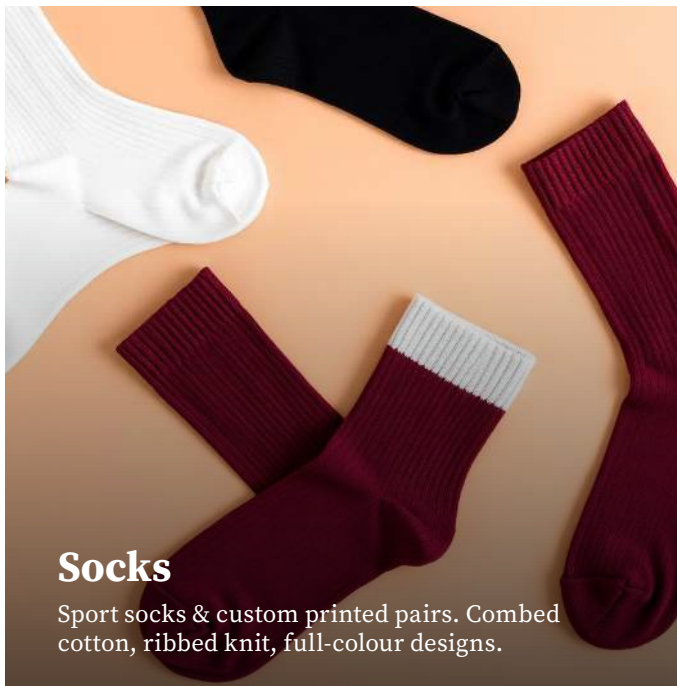

Caps

Baseball, golf, trucker & bucket.
Embroidered or printed.

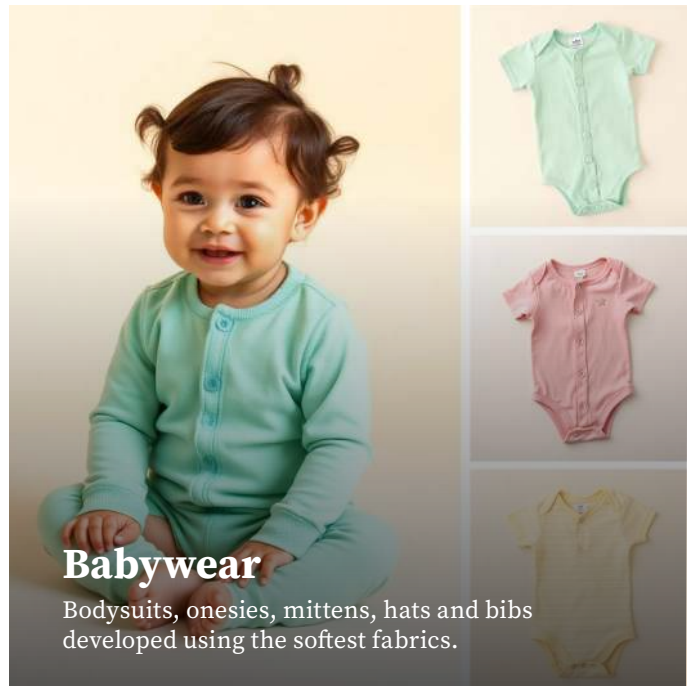

Bags

Jute, juco, canvas tote, drawstring & non-woven.
Eco-friendly, custom branded.

Socks

Sport socks & custom printed pairs. Combed cotton, ribbed knit, full-colour designs.

Babywear

Bodysuits, onesies, mittens, hats and bibs
developed using the softest fabrics.

Three techniques One finish

01

Sublimation Print

All-over and edge-to-edge print on polyester. Soft hand, no cracking, vivid permanence.

02

DTF Print

Photographic detail with stretch and durability. Ideal for full-colour artwork on any base.

03

Screen Print

Long-run vibrancy. Bold solids, opaque colours, premium hand-feel on cotton bases.

Embroidery

A signature, stitched in

Our embroidery studio runs state-of-the-art 20-head Tajima machines, capable of stitching on virtually any fabric — t-shirts, polos, caps, bags and uniforms. From monogramming and lettering to full logo embroidery, every stitch is calibrated for crisp edges, true colour and a finish that lasts wash after wash.

From concept to closet

01 Design & Brief

Our in-house design team works with you from the start. Share your references, brand colours, fabric preferences & we translate them into tech-packs. Just your idea, sharpened and ready to build.

02 Sample

We build you a physical sample before a single bulk piece is cut. You approve the fit, the fabric, the finish. Nothing moves without your sign-off.

03 Production

Once approved, your order enters our in-house production floor. Cut, stitched, printed, embroidered, labelled, packed & delivered. All under one roof, all on your timeline.

Labels · Tags · Barcodes

The last detail that signs the work

Woven labels, printed tags and barcodes — produced in-house to match your brand exactly. From neck labels to hangtags and care instructions, every element is finished with the same care as the garment itself.

Trusted by

Worn by the names that define this region
